Almutlak

Al-Mutlak Filters Company

Al-Mutlak Filters Company founded in 1980 in Jeddah - Saudi Arabia as part of Al-Mutlak Trade & Industries Company, the leading group in Saudi Arabia for heavy transport industry.

We are manufacturing each filter components, not just assembling them, using the most up-to-date equipments and utilized the most advanced manufacturing techniques which give our filter elements exceptional uniformity and greater efficiency.

Al-Mutlak Group

Quality Is Our Major Concern

We strive for continuous improvement, sustained growth and corporate excellence in our activities and practices.

In fact our Strong work ethic and concern to meet or exceed original equipment specifications, has made it easy to integrate state of the art quality system throughout our organization, therefore we are steadily gaining the ability to eliminate problems before they happen and to set our quality goals continually higher.

Complete Range

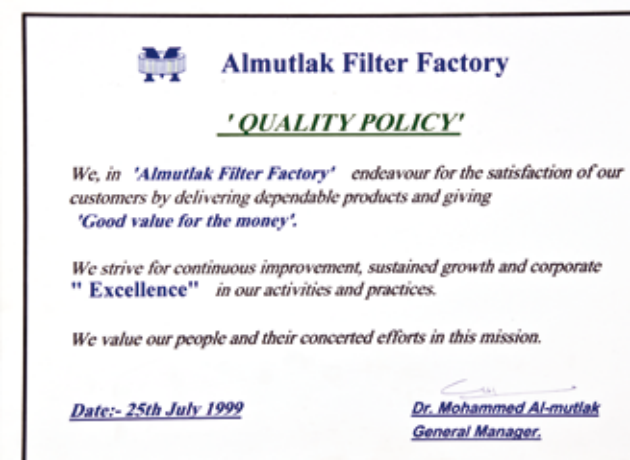

We manufacture oil, fuel and air filters to the highest international specifications covering almost all global brands for automotive passenger and heavy duty vehicles machineries, gas-turbines and off-road equipments.

We offer a wide range of filters to suit any applications:

- › Cars, Light Trucks and Vans
- › Heavy duty trucks
- › Earth moving equipments
- › Compressors
- › Agriculture and Machinery
- › Gas Turbines
- › Generators

Warranty

We warrant all our products to be free from defects in workmanship and materials, if any machine damage is proven to have been caused by a new, properly installed Al-Mutlak product during the equipment or machine manufacturer's recommended services interval, we will reimburse the owner for the portion of the repair cost which is necessary to restore the machine to its condition immediately prior to the time of change, in the event of a claim.

Advanced Technology

Our team of technicians and engineers operate the most up-to-date equipment and utilized the most advanced manufacturing techniques .

Finest Raw Materials

We use the highest quality raw-materials which conform to international standards. They are procured primarily from Europe and other approved sources; make our verification is done by our well-qualified engineers.

Skilled Manpower

Our Human Resources Department is correctly working to employ the most skilled workers. Training programs are regularly organized to maintain and upgrade skill levels and techniques.

Stringent Quality

Quality is our major concern. We strive for continuous improvement, sustained growth and corporate excellence in our activities and practices. Our filters are tested for performance in accordance with International Standards ISO 4548 (SAE 806) and ISO 5011 (SAE 726).

Customize Products

We also have the capability and flexibility to customize the manufacture of filters to suit customers' specific requirements and specifications.

ISO Certification

Al-Mutlak has achieved ISO 9001 certification, meeting the highest standards in the industry. Al-Mutlak Filter Company, Founded in 1980 by Mutlak Mohammed Almutlak.

We offer over 4,000 filter part numbers – covering almost all global brands for automotive passenger, light utility and heavy duty vehicles, gas-turbines and off-road equipments. Al-Mutlak goal is to have all manufactured products meet or exceed the OEM's specifications. Our design philosophy, coupled with manufacturing

under ISO9001 quality systems, assure that your equipment is properly protected.

On a corporate basis, we are part of Al-Mutlak Trade & Industries Group, a diversified group of manufacturing and trading companies, since 1965. Our association enables us to contribute and benefit from synergies in quality and

advanced filter technology and to steadily expand our ability to provide world-class filter protection.

Oil Filters

Almutlak oil filters are designed to keep oil as clean as possible to ensure the engine performance remains consistent. Our oil filters purify oils from dirt and other particles such as dust, abraded metal, carbon deposits and soot particles to produce the best overall mix of filtration, oil flow management and durability. They are designed to be used with all types of engine, hydraulic or gear oil applications.

We offer a wide range of products including spin on, element and eco-filters. They are all high quality and designed to meet, or exceed OEM'S technical specifications.

Fuel Filters

Fuel flow is managed through the injection or carburetor system by the function of the fuel pump. Dirt or water particles in the fuel can cause abrasion or corrosion in the engine therefore contributing towards excessive wear or other damage to the components.

Our fuel filters are designed to keep fuel as clean as possible to ensure that fuel system remains functional and the fuel flow management, along with engine performance, remain consistent. Our fuel filters include spin on, element and eco-filter types which are all high standards and designed to meet, or exceed, OEM's specifications for "fit, form and function".

Air Filters

Almutlak air filters are designed to be functional, highly efficient to provide the best performance throughout the life of the filter. This allows optimum composition of the air, fuel mix and ensures stable engine performance.

Clean air intake is a key characteristic for problem free driving and long term engine life. Particles and pollutants that enter the air intake and, without correct filtering, could enter the combustion chamber causing damage to engine components. Our air filters provide effective filtering against particles such as dust, pollen, sand, soot or even drops of water ensuring that only clean air is passed to the combustion chamber.

Our program includes panel, round, oval and conical filters which are all high standards and are designed to meet, or exceed, the OEM's specifications.

Gas Turbines Air Filters

Almutlak gas turbines filters are sturdy in construction, are designed to be effective in various environment, (even the most harsh and most challenging), manufactured from special cellulose synthetic media (that enables it to have superior dust holding capacity), have good pulse cleaning properties, and high efficiency with lower pressure drop through out the life.

Moreover, we are the main supplier for Saudi Electric Co.
